

ASAKUA

empowering
aquaculture
with reliable
solutions

ASAKUA

our story

Founded in 2009 by two dedicated aquaculture engineers, ASAKUA was established with a clear mission: to provide innovative and reliable solutions for offshore fish farms worldwide. From the very beginning, our focus has been on improving the quality of products and services we offer by adding value through superior design, advanced manufacturing processes, and expert on-site services.

With over a decade of experience in the industry, we have developed a reputation for excellence, working closely with fish farms to ensure their unique needs are met with precision and care. Our commitment to innovation, sustainability, and customer success drives everything we do, from concept to completion.

At ASAKUA, we understand the challenges of offshore aquaculture and are constantly evolving to meet them, providing tailored solutions that enhance productivity, operational efficiency, and long-term viability. Whether you're starting a new fish farming venture or expanding your existing operations, we are here to support you every step of the way.

ASAKUA

our vision

At ASAKUA, our vision is to lead the aquaculture industry into a sustainable and innovative future.

We believe that aquaculture is not just a business it's a crucial component in feeding the world, preserving marine ecosystems, and supporting the global food supply chain. As pioneers in aquaculture solutions, our mission is to provide fish farmers with the most reliable and advanced equipment, paired with expert on-site commissioning services.

By empowering our clients with cutting-edge technology and comprehensive support, we are committed to driving the growth and success of fish farming enterprises worldwide. Our approach combines efficiency, sustainability, and expertise to meet the unique needs of every aquaculture project, whether a start-up or an established farm looking to scale its capacity.

We envision a world where aquaculture plays a key role in sustainable food production, and we are dedicated to ensuring that our clients have the tools, knowledge, and support they need to thrive. Through innovation, collaboration, and a relentless focus on quality, we aim to expand the possibilities of aquaculture and help shape the future of this vital industry.

Together, let's create a sustainable, prosperous, and thriving future for aquaculture.

Automation Systems

To enhance and streamline daily operations on offshore fish farms, we provide a range of automation systems, including net cleaners, underwater cameras, automated feeding systems, and live fish transfer pumps. These solutions are designed to optimize efficiency, reduce manual labor, and improve overall farm management.

HDPE Boats

We manufacture high-density polyethylene (HDPE) boats that are both lightweight and exceptionally durable. These boats are ideal for fish farming operations, offering corrosion resistance and longevity in harsh marine environments.

Pontoons

Our floating pontoons are designed for versatility and stability, serving as essential platforms for aquaculture operations. They are robust, adaptable, modular, and easy to integrate into various fish farming setups.

Injection Moulded Plastics Parts

We manufacture durable, precision-engineered plastic components designed to withstand the harsh conditions of offshore environments. These parts ensure the structural integrity of fish farming cages, offering long-lasting performance.

Mooring

To secure fish farming cages in the sea, we offer specialized mooring equipment that provides stability and safety, even in challenging offshore conditions. Our mooring systems are engineered for reliability, giving fish farms the support they need to operate efficiently.

Our Expertise

At ASAKUA, we specialize in delivering high-quality products and services that meet the specific demands of offshore aquaculture. With a deep understanding of the industry, we provide innovative and reliable solutions that ensure the safety, efficiency, and sustainability of fish farming operations worldwide.

With over a decade of experience, ASAKUA is committed to providing the expertise and solutions necessary to support the success of aquaculture businesses. Whether you are starting a new venture or looking to expand your existing operations, we have the products and services to help you achieve your goals.

Sea Cages

We design and manufacture durable sea cages using our own injection-molded plastic parts, ensuring the strength and longevity required in harsh offshore environments. As part of the complete structure, we also offer cage net bags, essential for safely stocking and maintaining fish within the cages.

Feasibility Studies

To support investors and clients in decision-making, we offer detailed feasibility studies and technical reports that provide a comprehensive analysis of project viability. Our expert team ensures that every aspect of the project, from planning to execution, meets the highest industry standards.

Installation and Commissioning

Beyond manufacturing, we provide comprehensive on-site installation services to ensure your fish farm equipment is set up and operating effectively. From planning to execution, our team ensures that every aspect of your aquaculture project is handled with precision and care.

Our Achievements

Since our founding in 2009, ASAKUA has grown into a global provider of solutions for offshore aquaculture, exporting our products and services to over 50 countries. We have played a key role in the construction of fish farms across Asia, Africa, and Europe, where the aquaculture market is rapidly expanding.

Our fish farms support the production of a wide variety of species, including trout, sturgeon, tilapia, barramundi, sea bream, sea bass, carp, and salmon. Our extensive portfolio spans diverse geographies and sea conditions, allowing us to tailor our solutions to the specific needs of each region.

Over the past decade, our team has accumulated invaluable experience by working on numerous projects across different environments. We've tackled everything from unique sea conditions to varying species requirements, making us experts in adapting our solutions to local challenges.

In recognition of our commitment to excellence, we were awarded the prestigious Gold Medal for Export by the Ministry of Trade in Turkey. This honor highlights our dedication to expanding the reach of our innovative aquaculture products and services across the globe, helping to grow and sustain the global fish farming industry.

SEA CAGES

DESCRIPTION

Cage assembly operation in Caspian sea region for Sturgeon fish farm.

MOORING

DESCRIPTION

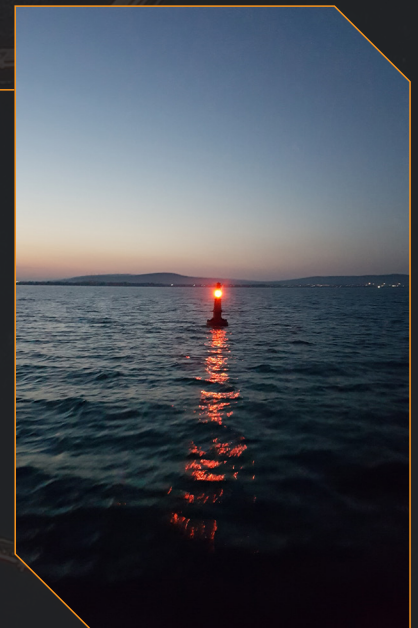

Mooring operation in West Africa region for Tilapia farming.

NAVIGATION BUOYS

DESCRIPTION

Navigation buoy with solar marine beacon anchoring in Black Sea region.

MOORING

DESCRIPTION

Mooring operation for Baramundi farming in Red Sea region.

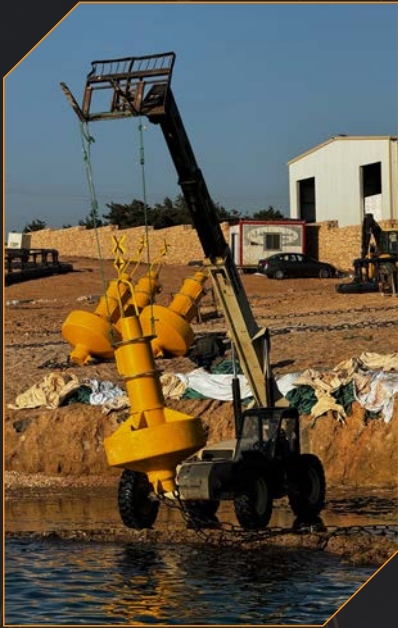

PONTOON

DESCRIPTION

Modular floating pontoon assembly operation in East Africa for Tilapia farming.

Project Portfolio

TURNKEY

DESCRIPTION

Turnkey delivery for Sea Bream farming in Mediterranean region.

MOORING

DESCRIPTION

Mooring operation for trout fish farm in Central Asia

TURNKEY

DESCRIPTION

Turnkey trout farming project in Central Asia

NAVIGATION BUOYS

DESCRIPTION

Mooring operation for Baramundi farming in Red Sea region.

MOORING

DESCRIPTION

Mooring operation in East Africa for Tilapia farming.

INJECTION MOULDING

DESCRIPTION

Manufacturing all range of Injection moulded brackets for sea cage.

HDPE PIPES

DESCRIPTION

HDPE Pipes for sea cages and pontoons.

MOORING BUOY

DESCRIPTION

Mooring buoy manufacturing from 200 liters up to 4000 liters capacity.

NAVIGATION BUOY

DESCRIPTION

Navigation buoy manufacturing from 1.2 meter diameter up to 3 meter diameter

PONTOON

DESCRIPTION

Tailor made modular platform manufacturing

Product Portfolio

CAGE NET

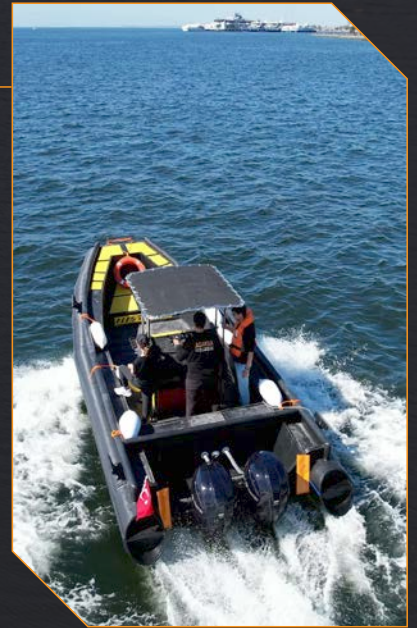

DESCRIPTION

Net mending service for fish farming operations.

HDPE BOAT

DESCRIPTION

HDPE service boats manufacturing

SEA CAGE

DESCRIPTION

Cage parts manufacturing and assembly service on-site.

MOORING ROPE

DESCRIPTION

Rope works and supply for mooring applications.

MOORING ACCESSORIES

DESCRIPTION

Manufacturing accessories for mooring purposes

Our Location

Our state-of-the-art manufacturing facility is located in İzmir, Turkey, a prime location within the heart of the country's thriving aquaculture industry. Spanning 5,000 square meters, the facility is equipped with advanced injection molding machines capable of producing parts up to 90 kg, ensuring that we can meet the high demands of offshore aquaculture equipment manufacturing.

In addition to our injection molding capabilities, the facility also includes dedicated steel and plastic workshops, allowing us to handle both metal and plastic components in-house. This vertical integration ensures full control over the production process, leading to consistent quality and faster turnaround times.

Strategically situated between İzmir's two main ports, our facility offers seamless logistics solutions, making the export of our products to over 50 countries around the world both efficient and cost-effective.
